THIS INDEX IS MORE than a means for quickly referring to an article or locating information on a subject. It is a semi-annual report of the editors to their readers. In the preparation of this material the staff has traveled over 0,000 miles in the six months' period and has been assisted by over 200 contributors, each of whom is a specialist in his eld. Thus have we been able to give our readers a thoroughly balanced program of the latest information in electrical ngineering, construction, operation and maintenance in addition to statistics, commercial data and an unparalleled ews service every week. The Editors.

SUGGESTIONS FOR USE OF INDEX

Articles in this index are arranged alphabetically according to subjects. This is not an index of titles. Each article is indexed under the general subject which the article treats. For example, if the article deals with generator testing it will be indexed under *tests*, if it treats industrial wiring it will be indexed under *wiring*, etc.

Feature length articles and major news items have been cross-referenced to facilitate location of articles without extended search.

The following material has not been indexed:

Personal items.
New Equipment.
Book Reviews.
Rate Changes.
Minor Financial News.
Minor Manufacturing and Market News.

Related articles have been grouped under such heading as:

Appliances — All articles dealing with ranges, water heaters, ironers, etc., are indexed under appliances, rather than under the type of appliance discussed.

Associations, Societies and Governmental Agencies — Major news items and articles relating to this group are indexed under the individual organization name.

Court Decisions and Suits — Major items are indexed under the name of the company involved.

Public Utilities — Articles dealing with individual power companies and with their related activities are indexed alphabetically under the company name and *not*, as formerly, under the heading Public Utilities.

Rural Electrification — All articles dealing with various phases of supplying service to rural areas are indexed under this subject head.

Statistics — All articles dealing with any type of statistics are indexed under Statistics, regardless of the general subject class that the article falls under.

Steam Stations and Developments, Hydro Plants and Developments — Articles about generating stations are listed under one or the other of these heads, according to the type of station.

Following the main index is an index of authors of signed articles. In this index the exact title is listed.
